Abstract

Here comes the abstract in English.

Keywords : keywords, in, English.

1. Introduction

You can use sections, subsections and subsubsections.

You must use the English quotes (‘ ‘ and ’ ’). Latex inserts automatically a double space after a period. So, if you use a period in other contexts (in an abbreviation, for example), make use of \@ to insert a single space in place of a double space.

Use the “cite” command to insert citations in the document. For example :

(Inproceedings 2007), (Book 2007 : 12–14), (Proceedings 2006; Phdthesis 2007; Misc 2007; Article 2007; Incollection 2007; Inbook 2007; Booklet 2007; Masterthesis 2007) and (Techreport 2007; Manual 2007; Unpublished).

This is a table (table 1).
